PROFESSIONAL SUMMARY

WordPress Developer with experience in building custom themes, plugins, and responsive websites using PHP, HTML, CSS, JavaScript, and MySQL. Skilled in performance optimization, SEO, and Agile development.

EDUCATION

Bachelor of Technology – **CSE** 2017 - 2022

Jawaharlal Nehru Technological University Kakinada (JNTUK) / Avanthi's St. Theressa Institute of engineering & technology, Garividi.

TECHNICAL SKILLS

HTML, CSS, JavaScript, PHP, SQL, WordPress, Elementor, MySQL, phpMyAdmin, Git, GitHub, JIRA, SEO, Performance Optimization, Debugging, Responsive Design, Workflow Management, Version Control, Adaptable, Quick Learner of New Technologies.

EXPERIENCE

Full-Stack Developer Intern | Leap Robots *(04/05/2024 – 18/11/2024)*

- Developed and deployed responsive WordPress websites using custom themes, Elementor, and PHP, optimizing performance by 25%, improving SEO, and boosting load speed by 40% through database tuning and on-page enhancements.
- Collaborated in Agile teams using Jira and GitHub for sprint management and version control, integrated third-party APIs, and ensured high-quality, scalable solutions with thorough testing and cross-browser compatibility.

PROJECT

Social Distancing Detection Using Deep Learning — Major University Project

- Developed a real-time social distancing detection system using Python, OpenCV, and YOLOv3 to identify individuals and calculate distances from live video streams.
- Automated violation alerts to support COVID-19 safety measures and enhance public monitoring systems.

RS Fashion (eCommerce Website) – WordPress

- Created a responsive eCommerce site using WordPress, WooCommerce, Elementor, and WPBakery with features like user login, product management, and payment integration.
- Enhanced performance and SEO with caching, image optimization, and custom PHP/HTML/CSS/JavaScript theme modifications.

Product Filtering Project — PHP

- Built a dynamic product filtering system using PHP, MySQL, HTML, CSS, and JavaScript to sort products by price and stock in real time without page reloads.
- Improved user experience with a responsive UI and optimized database queries for faster data retrieval.
